

# Release Notes for Cisco Cyber Vision

## Release 4.1.5

For users upgrading to 4.1.5 from previous versions, please carefully read the Cisco Cyber Vision 4.1.5 update procedure.

## Compatible device list

Center	Description
<b>VMware ESXi OVA center</b>	VMware ESXi 6.x or later
<b>Windows Server Hyper-V VHDX Center</b>	Microsoft Windows Server Hyper-V version 2016 or later
<b>Cisco UCS C220 M5 CV-CNTR-M5S5</b>	Cyber Vision Center hardware appliance (Cisco UCS® C220 M5 Rack Server) - 16 core CPU, 64 GB RAM, 800GB drives
<b>Cisco UCS C220 M5 CV-CNTR-M5S3</b>	Cyber Vision Center hardware appliance (Cisco UCS® C220 M5 Rack Server) - 12 core CPU, 32 GB RAM, 480GB drives
<b>AWS – Center AMI</b>	Amazon Web Services center image
<b>Azure – Center plan</b>	Microsoft Azure center plan
<b>Sentryo CENTER10</b>	Sentryo CENTER10 hardware appliance
<b>Sentryo CENTER30</b>	Sentryo CENTER30 hardware appliance
Sensor	Description
<b>Cisco IC3000</b>	Cyber Vision Sensor hardware appliance
<b>Cisco Catalyst IE3400</b>	Cyber Vision Sensor IOx application hosted in Cisco Catalyst IE3400 Industrial Ethernet switches
<b>Cisco Catalyst IE3300 10G</b>	Cyber Vision Sensor IOx application hosted in Cisco Catalyst IE3300 Industrial Ethernet switches with 10G ports
<b>Cisco IR1101</b>	Cyber Vision Sensor IOx application hosted in Cisco IR1101 Series Industrial Integrated Services Routers
<b>Cisco Catalyst IR8300</b>	Cyber Vision Sensor IOx application hosted in Cisco Catalyst IR8300 Rugged Series Routers
<b>Cisco Catalyst 9300, 9400</b>	Cyber Vision Sensor IOx application hosted in Catalyst 9300, 9400 Series switches
<b>Sentryo SENSOR3</b>	Sentryo SENSOR3 hardware appliance
<b>Sentryo SENSOR5</b>	Sentryo SENSOR5 hardware appliance
<b>Sentryo SENSOR7</b>	Sentryo SENSOR7 hardware appliance

## Cisco Cyber Vision 4.1.5 update procedure

Cisco Cyber Vision 4.1.5 update procedure will depend on the architecture deployed and the tool used to deploy it.

### Upgrade Path

Upgrade Path to Cisco Cyber Vision 4.1.5

Current Software Release	Upgrade Path to Release 4.1.5
If version prior to 3.2.4	Upgrade first to 3.2.4, then to 4.0.0, and to 4.1.5
Version 3.2.4	Upgrade first to 4.0.0, then to 4.1.5
Version 4.0.0 to 4.1.4	Upgrade directly to Release 4.1.5

### Compatibility Guidelines

There is downward compatibility of one version between the Global Center and the Center with sync and sensors.

- Global Center (Version N): Compatible with Centers with sync with versions N and N-1.  
e.g. Global Center version 4.1.0 can manage local Centers with versions 4.1.0 and 4.0.3.
- Center with sync (Version N): Compatible with sensors with versions N and N-1.  
e.g. Center with sync version 4.1.0 can manage sensors with versions 4.1.0 and 4.0.3.

### Data purge

The Center database in 4.0.0, 4.0.1, 4.0.2 or 4.0.3 will be migrated to the new 4.1.x schema. All components, activities, flows, events, etc. will be migrated.

The new data retention policies introduced in 4.0.0 are still valid in 4.1.x. Once migrated, the following expiration settings will be applied, and the system will run the purge process unless the configuration is modified within 2 days:

- Events after 6 months.
- Flows after 6 months.
- Variables after 2 years.

## Center updates

### Architecture with Global Center

**Preliminary checks:** it is highly recommended that you check the health of all Centers connected to the Global Center and of the Global Center itself before proceeding to the update.

To do this check, it is recommended to use an SSH connection to the Center and to type the following command:

```
systemctl --failed
```

The number of listed sbs-\* units should be 0, otherwise the failure needs to be fixed before the update.

Cisco Cyber Vision system check – 0 failure

```
root@Center21:~# systemctl --failed
0 loaded units listed.
root@Center21:~#
```

All sbs services need to be running in a normal state before performing an update. If any is listed as failed it must be fixed prior upgrading.

Cisco Cyber Vision system check – example of failure

```
root@Center21:~# systemctl --failed
UNIT                                LOAD    ACTIVE SUB    DESCRIPTION
● sbs-marmotd.service loaded failed failed marmotd persistence service

LOAD   = Reflects whether the unit definition was properly loaded.
ACTIVE = The high-level unit activation state, i.e. generalization of SUB.
SUB     = The low-level unit activation state, values depend on unit type.

1 loaded units listed.
root@Center21:~#
```

Rebooting of the Center most often solves the issue. If not, please contact the support.

In the case of a distributed architecture, the following steps need to be followed:

1. Update the Global Center:
  - a. Either using the Graphical User Interface:
    - File= CiscoCyberVision-update-combined-4.1.5.dat
    - Navigate to Admin > System, use the System Update button and browse and select the update file.
  - b. Or using the Command Line Interface (CLI):
    - File= CiscoCyberVision-update-center-4.1.5.dat
    - Launch the update with the following command:  

```
sbs-update install /data/tmp/CiscoCyberVision-update-center-4.1.5.dat
```
2. Update the Centers connected to the Global Center with the same procedure used for the Global Center (User Interface or CLI).
3. Update the sensors from their corresponding Center (not from the Global Center):
  - a. Hardware sensors:
    - i. If you used the combined file to update the Center which owns the sensor, and the SSH connection from the Center to the allowed sensor, the hardware sensors (IC3000 and Sentryo SENSOR's) were updated at the same time.
    - ii. If the Cisco IC3000 sensor was deployed using the Sensor management extension, it can be upgraded by deploying it again.
    - iii. If not, the update needs to be done from the Command Line Interface (CLI):
      - File= CiscoCyberVision-update-sensor-4.1.5.dat
      - Launch the update with the following command:  

```
sbs-update install /data/tmp/CiscoCyberVision-update-sensor-4.1.5.dat
```

You can check the sensor version on the Administration / Sensor Explorer page, to make sure that the version is 4.1.5.

Note: Cisco Cyber Vision Sensor application should not be updated from the IC3000 Local Manager because the configuration will be lost. In case this is done, the sensor enrollment package needs to be deployed again.

- b. IOx sensors:
- i. If you have installed the sensors with the sensor management extension, first upgrade the extension and then update the sensors.
    - File = CiscoCyberVision-sensor-management-4.1.5.ext
    - Navigate to Admin > Extensions. In the Actions column, use the update button and browse to select the update file.
    - The Cisco Cyber Vision sensor management extension can also be updated from the CLI with the command:

```
sbs-extension upgrade /data/tmp/CiscoCyberVision-sensor-management-4.1.5.ext
```

- ii. Then all sensors need to be updated with the extension, to do so, access the sensor administration page, and use the menu “Manage Cisco devices” / “Update Cisco devices” or use the redeploy. A complete procedure is available in the document (part “Cisco Cyber Vision new features and improvements”) or in all sensor deployment guides version 4.1.5 minimum.
- iii. If you have not installed the sensor with the sensor management extension, the upgrade of the sensor can be performed with the sensor package from the platform Local Manager or from the platform Command Line. This procedure is described in the corresponding sensors installation guides.
  - IE3x00 and IR1101 files = CiscoCyberVision-IOx-aarch64-4.1.5.tar or CiscoCyberVision-IOx-Active-Discovery-aarch64--4.1.5.tar
  - Catalyst 9300 and 9400 and IR8340 files = CiscoCyberVision-IOx-x86-64-4.1.5.tar or CiscoCyberVision-IOx-Active-Discovery-x86-64-4.1.5.tar.

**Important remark regarding CiscoCyberVision-IOx-x86-64 sensor application update:**

**The sensor update through the Local Manager of a Catalyst 9300, 9400 or IR8340 files is not possible from a release 4.1.2 (or lower) to a release 4.1.3 (or higher) due to the addition of the rspan compatibility. The sensor application needs to be redeployed and the enrollment package uploaded again.**

## Architecture with one Center

In the case of a single Center, the following steps need to be followed:

1. Update the Center:

a. Either using the Graphical User Interface:

- File= CiscoCyberVision-update-combined-4.1.5.dat
- Navigate to Admin > System, use the System Update button, and browse and select the update file.

b. Or using the Command Line Interface (CLI):

- File= CiscoCyberVision-update-center-4.1.5.dat
- Launch the update with the following command:

```
sbs-update install /data/tmp/CiscoCyberVision-update-center-4.1.5.dat
```

2. Update the sensors:

a. Hardware sensors:

- i. If you used the combined file to update the Center which owned the sensor and the SSH connection from the Center to the allowed sensor, the hardware sensors (Cisco IC3000 and Sentryo SENSOR's) were updated at the same time.
- ii. If the Cisco IC3000 sensor was deployed using the sensor management extension, it can be upgraded by deploying it again.
- iii. If not, the update needs to be done from the Command Line Interface (CLI):

- File= CiscoCyberVision-update-sensor-4.1.5.dat
- Launch the update with the following command:

```
sbs-update install /data/tmp/CiscoCyberVision-update-sensor-4.1.5.dat
```

b. IOx sensors:

- i. If you have installed the sensors with the sensor management extension, first upgrade the extension itself and then all sensors will have to be updated.
  - File = CiscoCyberVision-sensor-management-4.1.5.ext
  - Navigate to Admin > Extensions. In the Actions column, use the update button and browse to select the update file.

The Cisco Cyber Vision sensor management extension can also be updated from the CLI with the command:

```
sbs-extension upgrade /data/tmp/CiscoCyberVision-sensor-management-4.1.5.ext
```

- ii. All sensors need to be updated with the extension. To do so, access the sensor administration page, and use the menu “Manage Cisco devices” / “Update Cisco devices” or use the redeploy button. A complete procedure is available in the document (part “Cisco Cyber Vision new features and improvements”) or in all sensor deployment guides version 4.1.5 minimum.
- iii. If you have not installed the sensor with the sensor management extension, the upgrade of the sensor can be performed with the sensor package from the Local Manager platform or from the Command Line Interface. This procedure is described in the corresponding sensors installation guides.
  - IE3x00 and IR1101 files = CiscoCyberVision-IOx-aarch64-4.1.5.tar or CiscoCyberVision-IOx-Active-Discovery-aarch64--4.1.5.tar
  - Catalyst 9300 and 9400 and IR8340 files = CiscoCyberVision-IOx-x86-64-4.1.5.tar or CiscoCyberVision-IOx-Active-Discovery-x86-64-4.1.5.tar.

**Important remark regarding CiscoCyberVision-IOx-x86-64 sensor application update:**

**The sensor update through the Local Manager of a Catalyst 9300, 9400 or IR8340 files is not possible from a release 4.1.2 (or lower) to a release 4.1.3 (or higher) due to the addition of the rspan compatibility. The sensor application needs to be redeployed and the enrolment package uploaded again.**

Guidelines here: [Cisco Cyber Vision Sensor Application for Cisco Switches Installation Guide, Release 4.1.3](#)

### **AWS and Azure Centers**

In case of a Center deployed in AWS or Azure, follow the same procedure described with one Center hereabove.

## Cisco Cyber Vision 4.1.5 important changes

### Command line access

In 4.1.0, a major change regarding the Center Command Line Interface (CLI) access through serial console or SSH was made. The user root is no more usable to establish the connection. A new user called 'cv-admin' must be used. This user has limited rights and many CLI commands will require permission elevation:

- prefix the command with "sudo".
- or open a root shell using "sudo -i" and enter the command.

### Communication port and protocol changes

#### Port

No modification in 4.1.5.

#### Protocol

No modification in 4.1.5.

#### API

No modification in 4.1.5.

#### SYSLOG

No modification in 4.1.5.

## Cisco Cyber Vision Resolved Caveats

CDETS	Description
CSCwe10575	Expiration - purge flow_properties_statistics based on flow period
CSCwe63443	sbs-diag sensor minor changes
CSCwe63440	Improve flow purge
CSCwe63441	Rabbitmq queues are not limited in size
CSCwe63445	RBAC: User Admin Read Rights allow to modify roles and security settings

## Cisco Cyber Vision Open Caveats

Issues ID / CDETS	Component	Description
<b>CSCwb12630</b>	Center + ISE	All components are not synchronized with ISE
<b>CSCvy57108</b>	Center	Linux computer incorrectly tagged as Windows
<b>CSCwd39017</b>	Center	Missing information in the Smart License Usage

## Links

### Software Download

The files below can be found at the following link:

<https://software.cisco.com/download/home/286325414/type>

Center	Description
<b>CiscoCyberVision-center-4.1.5.ova</b>	VMware OVA file, for Center setup
<b>CiscoCyberVision-center-with-DPI-4.1.5.ova</b>	VMware OVA file, for Center with DPI setup
<b>CiscoCyberVision-center-4.1.5.vhdx</b>	Hyper-V VHDX file, for Center setup
<b>CiscoCyberVision-sensor-management-4.1.5.ext</b>	Sensor management extension installation file
Sensor	Description
<b>CiscoCyberVision-IOx-aarch64-4.1.5.tar</b>	Cisco IE3400, Cisco IE3300 10G, Cisco IE9300, Cisco IR1101 sensor installation and update file
<b>CiscoCyberVision-IOx-Active-Discovery-aarch64--4.1.5.tar</b>	Cisco IE3400, Cisco IE3300 10G, Cisco IE9300 Cisco IR1101 Active Discovery sensor installation and update file
<b>CiscoCyberVision-IOx-IC3K-4.1.5.tar</b>	Cisco IC3000 sensor installation and update file
<b>CiscoCyberVision-IOx-x86-64-4.1.5.tar</b>	Cisco Catalyst 9x00 and Cisco Catalyst IR8340 sensor installation and update file
<b>CiscoCyberVision-IOx-Active-Discovery-x86-64-4.1.5.tar</b>	Cisco Catalyst 9x00 and Cisco Catalyst IR8340 Active Discovery sensor installation and update file
Updates	Description
<b>CiscoCyberVision-Embedded-KDB-4.1.5.dat</b>	KnowledgeDB embedded in Cisco Cyber Vision 4.1.5
<b>CiscoCyberVision-update-center-4.1.5.dat</b>	Center update file for upgrade from release 4.0.x or 4.1.x to release 4.1.5
<b>CiscoCyberVision-update-sensor-4.1.5.dat</b>	Cisco IC3000 Sensor and Sentryo Sensor3, 5, 7 update file for upgrade from release 4.0.x or 4.1.x to release 4.1.5
<b>CiscoCyberVision-update-combined-4.1.5.dat</b>	Center, IC3000 Sensor and Legacy Sensor update file from GUI for upgrade from release 4.0.x or 4.1.x to release 4.1.5

Cisco Cyber Vision Center 4.1.5 can also be deployed on AWS (Amazon Web Services) and Microsoft Azure.

The Cisco Cyber Vision Center AMI (Amazon Machine Image) can be found on the AWS Marketplace:

<https://aws.amazon.com/marketplace/seller-profile?id=e201de70-32a9-47fe-8746-09fa08dd334f>

<https://aws.amazon.com/marketplace/search/results?searchTerms=Cisco+Cyber+vision>

The Cisco Cyber Vision Center Plan can be found on the Microsoft azure marketplace:

<https://azuremarketplace.microsoft.com/en-us/marketplace/apps/cisco.cisco-cyber-vision?tab=Overview>
