To whom it may concern,

Gossamer Security Solutions has completed the compliance review for **Cisco Unified Communications VG310/VG320/VG350** by **Cisco Systems, Inc.** (known as the "Product"), version **IOS 15.4**. The Product uses the FIPS 140-2 validated cryptographic module **IC2M Rel5** with Cert. #2388. The Product complies with FIPS 140-2 requirements. However, Gossamer Security Solutions did not execute full FIPS 140-2 validation testing on the Product.

The Product claims the following services:

1. SSHv2 for data encryption and integrity uses cryptographic functions in **IC2M Rel5** (Cert. #2388).
2. TLS for data encryption, authentication, and integrity uses cryptographic functions in **IC2M Rel5** (Cert. #2388).
3. SNMPv3 for data encryption and integrity uses cryptographic functions in **IC2M Rel5** (Cert. #2388).

For inquiries about the Product or documentation about the cryptographic module, please contact Cisco Systems, Inc.

Regards,

Gossamer Security Solutions, Inc.
