

# Cisco Web Security Appliance Application and Visibility Control Data Sheet

Cisco® Application and Visibility Control (WSA) on Web Security Appliance (AVC) allows you to monitor and control what is happening on your network by creating and enforcing granular policies for web 2.0 and mobile applications.

## Product overview

Enterprise networks are carrying a growing volume of both business and recreational web traffic. Often business applications, including cloud applications such as Cisco Webex® solutions, use the same HTTP and HTTPS protocols used by recreational web traffic. This complicates the task of optimizing network performance.

To optimize network performance and define policy for each of the applications utilizing the network, administrators need detailed visibility into the different types of applications running on the network.

The Cisco AVC solution offers truly innovative and powerful capabilities of application awareness in enterprise networks. AVC incorporates into the routing devices application recognition and performance-monitoring capabilities traditionally available as dedicated appliances. This integrated approach simplifies network operations, maximizes the return on network investments, and reduces the total cost of ownership.

With application awareness built into the network infrastructure, plus visibility into the performance of applications running on the network, AVC enables per-application policy for granular control of application bandwidth use, resulting in a better end-user experience.

## AVC category description

The following table gives a detailed description of the application types and their granular control available with AVC.

Application type	Application	Block	Granular control
Media	1x.com	✓	Block file upload block like/tag, block posting text, block sharing
Media	500px	✓	Block file upload, block like/tag, block posting text
Media	56.com	✓	Block file upload, block posting text, bandwidth limit
Media	ASF	✓	Bandwidth limit
Media	AcFun	✓	Block file upload, block like/tag, bandwidth limit
Media	Adnstream	✓	Bandwidth limit
Media	BaoFeng	✓	
Media	BaoMiHua	✓	Block file upload, block posting text, bandwidth limit
Media	Break	✓	Block file upload, block like/tag, block posting text, bandwidth limit
Media	ChaoXing Video	✓	Block posting text, bandwidth limit
Media	Dailymotion	✓	Block file upload, block posting text, block unsafe content, bandwidth limit
Media	Deezer	✓	
Media	DeviantArt	✓	Block download documents, block file upload, block like/tag, block posting text, block sharing

Application type	Application	Block	Granular control
Media	Earthcam	✓	Block file upload, block posting text, block sharing, bandwidth limit
Media	Flash Video	✓	Bandwidth limit
Media	Flickr	✓	Block file upload, block posting text, block unsafe content, block unsafe content (no rewrite)
