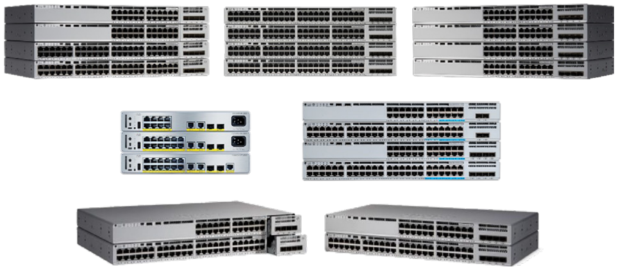
Cisco Catalyst 9200 Series Switches

Things to know

Before placing an order, please review the following:

- The Cisco Catalyst 9200 Series offer structure has three main components: the switch hardware, a Network stack perpetual license, and choice between a Cisco Catalyst software subscription license or a Cisco DNA subscription license.
- The software subscription licenses, and Network Stack perpetual licenses are smart license product IDs (SKUs). The subscription license, which comes with a perpetual license, is required with a hardware purchase.
- A Smart Account is mandated during purchase (for more information, please see the Smart Accounts section).
- Available service options:
  - Solution support
  - Enhanced Limited Lifetime Warranty (E-LLW)
  - Smart Net Total Care support (SNTC)
  - Success Tracks (Cisco CX)
  - Included base product-level support (Cisco Catalyst software subscription)



Common terminology

- Network Stack: NW
- Cisco Digital Network Architecture: DNA
  Cisco Catalyst software subscription: DNX
- Essentials: -E
- Advantage: -A
- Smart Account: SA
- Smart License: SL

Smart license: SL Purpose of this document

This document provides a detailed overview of the ordering process for Catalyst 9200 Series switches on Cisco Commerce Workspace.

Hardware and software order overview

Cisco Catalyst 9200 Series switches can be ordered through Cisco Commerce Workspace with a Cisco Catalyst or Cisco DNA term subscription at Essentials or Advantage software tiers.All subscription options include switch hardware coupled with Cisco IOS XE and the Network Stack software.

Software license options

	Cisco Catalyst Software Subscription^new	Cisco DNA subscription	Network Stack
Packages[1]	3, 5 or 7 Year Terms	3, 5 or 7 Year Terms	Perpetual
Tiers	Advantage, Essentials	Advantage, Essentials	Advantage, Essentials
Portability[2]	✓	✓	✓
Management options	Catalyst Center, Meraki Dashboard	Catalyst Center, Meraki Dashboard	CLI, Web UI
Included support	Base product-level support for Hardware, Software and OS	Software support (SWSS)	✗

[1] For all new orders, subscription licenses are mandatory and must be of the same tier as network licenses

[2] Portability within the same series of Catalyst 9000 hardware

Note that for both the Cisco Catalyst and Cisco DNA software subscriptions for Switching:

- Cisco software features and tier levels (Essentials, Advantage) remain the same.
- Hardware replacements are accessed separately through the Catalyst warranty program.[1]

[1] Hardware replacements via the Catalyst warranty program provides a best effort next business day response for the United States, Canada, Countries of the European Union, Australia, and New Zealand. Elsewhere, Cisco will ship the advance replacement on the next business day, but actual delivery times might vary depending on customer location. Taxes and duties might apply and must be paid by the recipient of the replacement part.

Catalyst software subscription feature matrix

For the latest features, please view the Cisco Catalyst 9200 Series Switches Data Sheet or Cisco Catalyst Software Subscription Matrix for Switching.

How to order a Cisco Catalyst 9200 Series switch

Both Network Stack licenses and Cisco Catalyst or Cisco DNA Software subscription licenses are mandatory at the time of purchase and come in two licensing tier options: Essentials (-E) and Advantage (-A). The Network Stack license, Network Essentials or Advantage is included with the hardware, while a Cisco Catalyst or Cisco DNA Software subscription term license needs to be selected at the time of order.

To order in the Cisco Commerce Workspace, follow these steps:

- Select the appropriate Catalyst 9200 Series switch SKU for the desired license tier type – Advantage (-A) or Essentials (-E).Click on “Edit Options” to choose software subscription type and term and to select hardware options and accessories.
- Choose the software subscription type – Cisco Catalyst or Cisco DNA Software subscription. To select a Cisco Catalyst Software subscription, the default Cisco DNA subscription must be deselected by using “Clear Section”.
- Choose the term of the subscription (3, 5 or 7 years).
- Add other components and options (e.g. network modules, secondary power supply, power cables, etc.)

Step-by-Step Ordering in Cisco Commerce Workspace

Enter the hardware SKU in [Cisco Commerce Workspace](#).

The Network Stack license is perpetual and included with the hardware by default per the respective hardware SKU suffix (-E, -A). For example: C9200-48P-E/ C9200-48P-A.

Check Summary to validate all terms are aligned to intended term.

Add Subtotal

Figure 2. Summary of added hardware

- Click on “Edit Options” to choose software subscription type and term and to select hardware options and accessories.

By default, a 3 year term Cisco DNA software subscription is selected, but can be changed to 5 or 7 year term or to a Cisco Cataylst 3, 5 or 7 year term license. A software term license aligning with hardware SKU suffis (-E or -A) is mandatory.

Cisco DNA Software subscription option

To modify the term of a Cisco DNA software subscription, click on the current term license in the “Configuration Summary” and select 3,5 or 7 year term as needed.

○	CAB-TA-AR Argentina AC Type A Power Cable	Qty	14 days	0.00
○	CAB-TA-DN Denmark AC Type A Power Cable	Qty	7 days	0.00

For switch models with internal HVDC power supply, no power cable needs to be selected. Customer or system integrator is responsible for the power cable as HVDC switches are usually installed in DC micro grid with customized cables and connectors. For more information, please consult with your Cisco sales representative.

C9200CX-12T-2X2G can be powered by UPOE+ or IEEE 802.3bt Class 6 and does not come with a power supply by default. Optional external power adaptors are also available if you do not plan to power the switch by PoE.

Licensing

All Cisco Catalyst 9200 Series switch hardware is available with two software options. Each software option includes two components, as shown in Table 1.

Table 1. License levels and options

License level	Network stack offer (perpetual and embedded)	Cisco DNA or Catalyst software subscription Offer (Term Based)
-E	Network Essentials	Essentials (3, 5, or 7 years)
-A	Network Advantage	Advantage (3, 5, or 7 years)

Smart Accounts

As with all Catalyst 9000 family switches, Smart Accounts are mandatory when ordering a Catalyst 9200 Series switch.

A Smart Account is a central data repository that provides visibility and access control to all the Cisco software licenses and entitlements across an organization. Smart Accounts allow customers to store, manage, and move assets across locations and devices and begin to use them immediately. Smart Accounts are required for enabling Cisco Smart Software Licensing.

After a Smart Account has been set up, customers have the flexibility to create subaccounts (virtual accounts) to help manage licenses for departments, areas, or locations within their organization. Licenses can be pooled within virtual accounts as needed. Smart Accounts support role-based user access controls, which allow the delegation of authority to account administrators at the Smart Account level or at the virtual account level. In addition, customers can assign partner visibility and management rights to their virtual or enterprise-level accounts.

Introduction to Smart Licensing

Cisco Smart Licensing is a flexible licensing model that provides you with an easier, faster, and more consistent way to purchase and manage software across the Cisco portfolio and across your organization. And it's secure – you control what users can access. With Smart Licensing you get:

- **Easy Activation:** Smart Licensing establishes a pool of software licenses that can be used across the entire organization—no more PAKs (Product Activation Keys).
- **Unified Management:** My Cisco Entitlements (MCE) provides a complete view into all of your Cisco products and services in an easy-to-use portal, so you always know what you have and what you are using.
- **License Flexibility:** Your software is not node-locked to your hardware, so you can easily use and transfer licenses as needed.

To use Smart Licensing, you must first set up a Smart Account on Cisco Software Central (software.cisco.com).

For a more detailed overview on Cisco Licensing, go to cisco.com/go/licensingguide

Smart Licensing

Smart Licensing is a cloud-based licensing managed platform built to simplify the purchase, deployment, and management of Cisco software assets. Entitlements are immediately deposited into a customer's virtual account for usage. This eliminates the need to install license files on every device. Products that are Smart License enabled communicate to Cisco to report consumption. The primary location to manage product registration and monitor Smart License consumption is the Cisco Smart Software Manager. License ownership and consumption are readily available to help make better purchase decisions based on consumption or other business needs.

Cisco Smart Software Manager

Cisco Smart Software Manager enables the management of software licenses. The interface allows you to activate your product, manage entitlements, and renew and upgrade software. An active Smart Account is required to complete the Smart License registration process.

To learn more about end-to-end Smart Account and Smart License management, visit https://www.cisco.com/c/en/us/buy/smart-accounts/software-manager.html.

Smart Account and Smart License availability

Important information about smart account and smart license availability.

- Catalyst 9200 Series switch SKUs are smart SKUs. License entitlements will be deposited in the Cisco Smart Software Manager and the Smart Accounts
- In addition to viewing entitlements, customers will also be able to track consumption

Smart Accounts are mandatory at the time of the order of a Catalyst 9200 Series switch. If a customer does not have a Smart Account set up prior to the purchase, a new Smart Account must be created at the time of purchase.

Deploying Smart Licenses for Cisco Catalyst 9200 Series switches

The Cisco Catalyst 9000 switch family comes in different licensing packages in comparison to previous-generations Cisco Catalyst platforms. Smart Licenses are transferable between the same types of devices (for example, from one Cisco Catalyst 9200 Series switch to another). (See Figure 18.)

Figure 18. Deploying Smart Licenses

In the deployment model shown in Figure 18, the Smart Account Cisco back end and Cisco Catalyst 9200 Series switches do not have a communication channel to report usage and consumption. They operate as separate entities. The switches must be configured in RTU mode with correct license level to enable the purchased feature set.

License usage and consumption reporting is performed on Cisco Smart Software Manager.

Services and warranty

The Solution Support service option is strongly recommended; it provides coverage for a Cisco DNA Essentials and Advantage software licenses. Additional product-level hardware support options are available: Smart Net Total Care support, partner service support, and enhanced limited lifetime hardware warranty. It is strongly recommended that the term of the hardware support contract match the software subscription license term to avoid any service support gaps for the duration of the term.

With a Cisco Catalyst Software subscription, base product-level hardware and software support is included.

The Cisco Catalyst Switch Software subscription delivers the same features and benefits you experience today with Smart Net Total Care and Software Support Basic **except** as follows:

- **The Cisco TAC response objective** for severity 1 and 2 service requests is:
  - **Four hours**, compared to one hour for Smart Net Total Care and Software Support Basic, and
  - **Next Business Day (NBD)** where commercially available for severity 3 and 4 service requests, compared to one hour for Smart Net Total Care during business hours and next business day outside of business hours, and next business day for Software Support Basic during and outside of business hours).
- **Hardware replacements** are accessed through the Catalyst warranty program, compared to a choice of eight RMA service-level options offered through Smart Net Total Care and Software Support Basic.

Because your enterprise network is the cornerstone of your IT and business, you may need faster response, more RMA choices and/or higher levels of support. Cisco Success Tracks and CX Cloud are designed to not only help accelerate adoption and maximize value for the security, automation, and assurance capabilities in your Cisco enterprise network, but it also fulfills your need for faster response objectives (30 minutes for severity 1 and 2 service requests) and all of Cisco's RMA options (eight, as fast as two hours).

Success Tracks is a set of comprehensive services accessed through the unified digital platform, CX Cloud. It offers streamlined, personalized access to Cisco experts and customized content that

can help you simplify solution adoption, resolve complex issues faster than single product-focused support, and optimize your IT environment through:

- **Expert Resources:** Expert guidance, best practices, and proven methodologies for a successful path to adoption.
- **Trusted Support:** Prescriptive support to detect, prevent, and efficiently solve complex hardware, software, and multi-product, multi-vendor issues through a Cisco primary point of contact who streamlines the support experience across your Cisco enterprise network.
- **Insights and Analytics:** Telemetry and intelligence with analytics that provide proactive and predictive insights and guided recommendations to help you solve problems faster and optimize operations.
- **Contextual Learning:** Digital learning resources, tailored instructor-led training, certification prep and virtual practice labs, designed to expand a workforce's skillset and capacity to achieve business outcomes faster and more efficiently.

Cisco Enhanced Limited Lifetime Hardware Warranty

Cisco Catalyst 9200 Series switches come with an Enhanced Limited Lifetime Hardware Warranty (E-LLW) that includes Next-Business-Day (NBD) delivery of replacement hardware where available and 90 days of 8 x 5 Cisco Technical Assistance Center (TAC) support.

Ordering information

Tables 3 through 12 provide ordering information for switches, network modules, stacking cables, Cisco DNA 48-port licenses, Cisco DNA 24-port licenses, Cisco DNA 12-port licenses, Cisco DNA 8-port licenses, and Cisco Catalyst Software licenses respectively.

Distribution Ordering Addendum

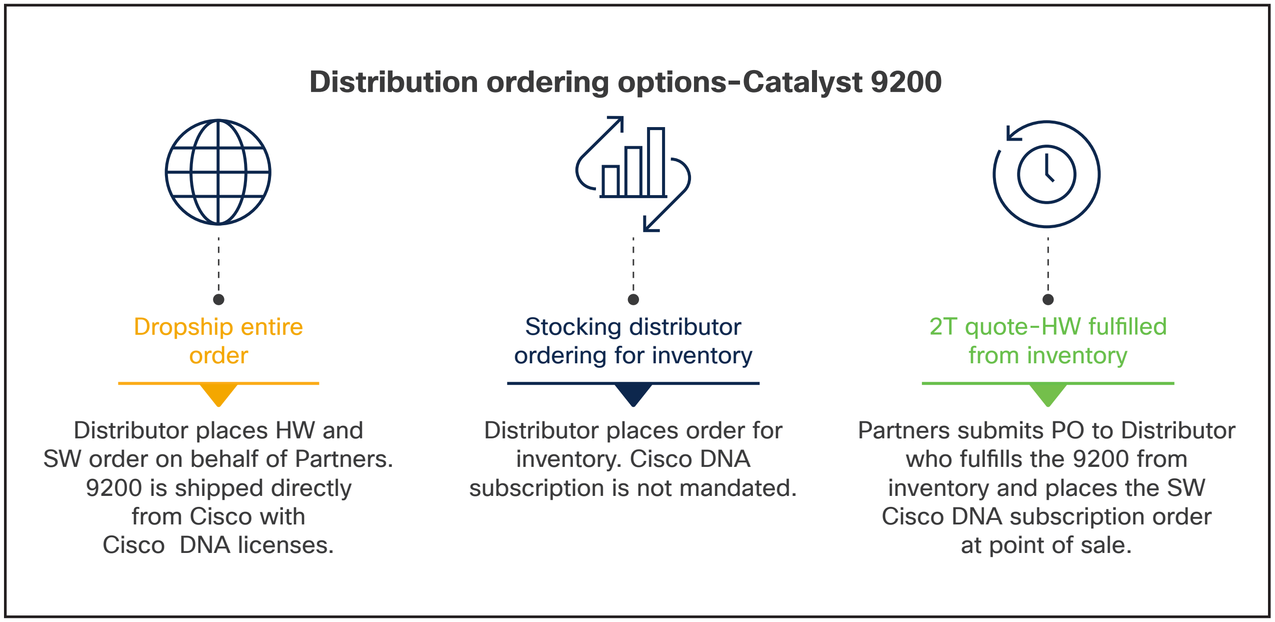
This section details the steps necessary to order Cisco Catalyst 9200 Series switches through distribution partners.



Distribution ordering options-Catalyst 9200

Dropship entire order

Distributor places HW and SW order on behalf of Partners. 9200 is shipped directly from Cisco with Cisco DNA licenses.

Stocking distributor ordering for inventory

Distributor places order for inventory. Cisco DNA subscription is not mandated.

2T quote-HW fulfilled from inventory

Partners submits PO to Distributor who fulfills the 9200 from inventory and places the SW Cisco DNA subscription order at point of sale.

Figure 20. Distribution ordering options for Cisco Catalyst 9200

Cisco Catalyst 9200 Series switches for stocking. By selecting “Stocking” as “Intended Use”, the system will show only hardware and does not include the Cisco Catalyst Advantage or Essentials subscription (the subscription must be ordered at point of sale).

① Select intended use as "stocking"

② Select appropriate PID: -E or -A

③ The DISTRIBUTOR-STOCKING SKU defaults. SW attach not enforced since the intent is to stock

Figure 21. Distributor ordering Cisco Catalyst 9200 for Stocking

Figure 21 above shows the scenario where the distributor places a stocking order. While placing a distribution stocking order for a Catalyst 9200 Series switch, the distributor will opt out of attaching mandatory subscription software. Orders for Stocking will include Hardware + OS (Network Stack).

The Opt out feature will exclude the Cisco Catalyst Subscription software only for distribution stocking orders.

Figure 22 shows the distributor using either the Cisco DNA Advantage or Essentials subscription options when fulfilling from inventory.

Cisco will also use this information to associate the HW SN to the mandatory attach subscription. In situations where the customer has not received their license entitlement through their Smart Account, Cisco will deposit the Mandatory Attach Smart Licensed Subscription into the End Customers Smart Account when the HW SN is registered with Cisco. This will ensure that the customer is accurately entitled to their purchased subscription and avoid any disruption in functionality of the switch.

Distributor Hardware Device Details

☑ Subscription is associated to hardware device(s) shipped from stock?

You must identify the hardware device that will be attached to this software subscription. This can be done by identifying the distributor sales order information or the serial number of the associated device(s). When the device registers with a Smart Account, the associated software subscription will be provisioned in to it, if the subscription is not already provisioned.

● Hardware Sales Order Information ○ Hardware Serial Number

Distributor Sales Order Number
Distributor SO Line Number
Cisco HW Part Number

It is recommended to provide all related hardware device information.

Cancel
Save

1. In the CCW UI, Click on "Add Device Details"
2. Click the checkbox, indicating that hardware was shipped from stock
3. Distributor must provide HW device information or Serial Number(s) for attached HW shipped from stock

When fulfilling a Catalyst 9200 Series switch from inventory the distributor is required to attach Cisco Catalyst subscription Software for each Hardware unit sold. In this scenario, the distributor will place a dropship Cisco Catalyst software subscription order with Cisco using CCW leveraging the equivalent spare SKUs shown below.

When ordering a Catalyst 9200 Series switch from Cisco, CCW will enforce the mandatory attach of the Cisco Catalyst Subscription Software to every Catalyst 9200 Series switch estimate, quote and order except stocking orders.

When submitting a drop ship subscription order associated to hardware shipped from stock, the distributor must submit the following information directly in CCW UI (or via B2B).

1. Distributor Hardware Sales Order Number (as submitted in hardware POS line)
2. Distributor Hardware Sales Order Line Number (as submitted in hardware POS line)
3. Cisco Hardware Part Number

<OR> Hardware Serial Number(s)

Catalyst 9200: Mandatory attach exceptions and approvals

Table 16 shows the distributor drop-shipping the entire order from Cisco to the end customer using Cisco DNA Advantage or Essential.

Table 16. Cisco Catalyst 9200 Series switch mandatory exceptions

Exception type	Exception Reason	Description	Additional Info needed for verification	Validation	Actors
Software Exception (Reseller ordering standalone SW subscription)	Standalone Subscription (Renewals)	The Subscription is not attached to any Hardware	MA flag should not be set to 'Yes' on order	No approval/ validation required	
	Buying additional Cisco DNA Center Entitlements (Software Upgrade)	The subscription is ordered in addition to an existing device associated with a mandatory attach subscription	MA flag should not be set to 'Yes' on order	No approval/ validation required	
Hardware Exception (Reseller ordering HW without MA subscription)	Enterprise Agreement	The HW is exempted from Mandatory Attach, as part of the Enterprise Agreement with the End Customer (EC)	1. For approval EA #. Customer Name. Customer Smart Account# 2. For HW POS lookup (Disti SO #	POM requests for the EA # from Distributor (who in turns receives it from Reseller), and works with the Cisco EA team to validate the EA with the EC and the license being part of the EA	POM/ Distributor

Exception type	Exception Reason	Description	Additional Info needed for verification	Validation	Actors
	Cisco One Portability	The HW is ordered by itself as an upgrade, and the customer is porting over their existing Cisco One License	1. For approval Existing Cisco One License details, SN# of Existing Device, Customer Name 2. For HW POS lookup (Disti SO #, Disti SO Line #, Cisco Part #) OR SN #	POM Governance Team requests for the old HW SN from the Distributor, to look up in the licensing tool by plugging in the SN, and confirm that they have attached SW license	POM/ Distributor
	DOA (Dead on Arrival)	The HW is ordered by itself as a replacement for a previous HW which was Dead on Arrival	1. For approval Customer service # and RMA # (optional) 2. For HW POS lookup (Disti SO #, Disti SO Line #, Cisco Part #) OR SN #	In case of DOA, there will be a CS case # Governance team requests the CS case # from Distributor, and looks up the case to confirm the DOA	POM/ Distributor

Any mandatory attach subscription orders missing this information will be considered non-compliant and Cisco will take necessary action to ensure compliance.
