## 2. Prime Infrastructure 2.x, Network Devices and Servers (Managed versus supported)

Supported Devices List\*

Supported Devices	Supported Devices
<ul style="list-style-type: none"> <li>• APs (Aironet)</li> <li>• Switches (Cat 2K, 3K, 4K, 6K)</li> <li>• Switches (S5500, S5600, S5700)</li> <li>• Routers (ISR 4K, 5K, 6K, 7K)</li> <li>• Switches (E2100, E2200)</li> </ul>	<ul style="list-style-type: none"> <li>• APs (Aironet)</li> <li>• ISE (ISE)</li> <li>• NAM (NAM)</li> <li>• ASA (ASA)</li> <li>• WAAS (WAAS)</li> <li>• 3rd party devices (Webex, WLC, etc)</li> </ul>

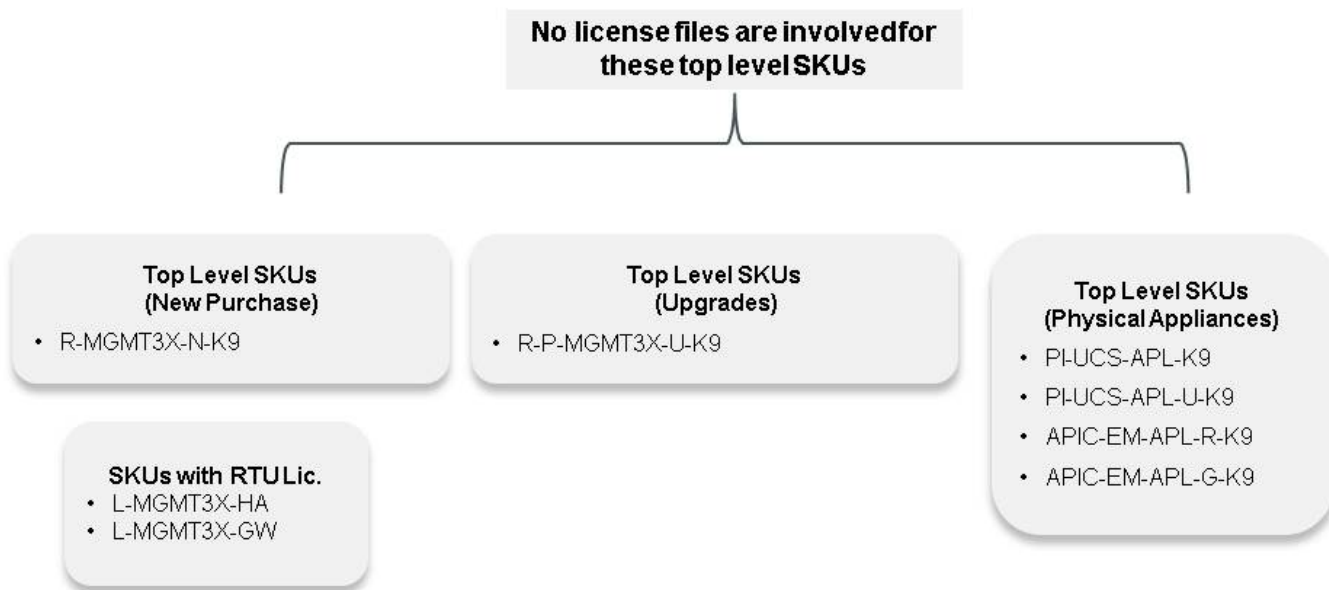

PI 2.x License Inventory

## 3. Prime Infrastructure 3.x, Network Devices and Servers (Managed versus supported)

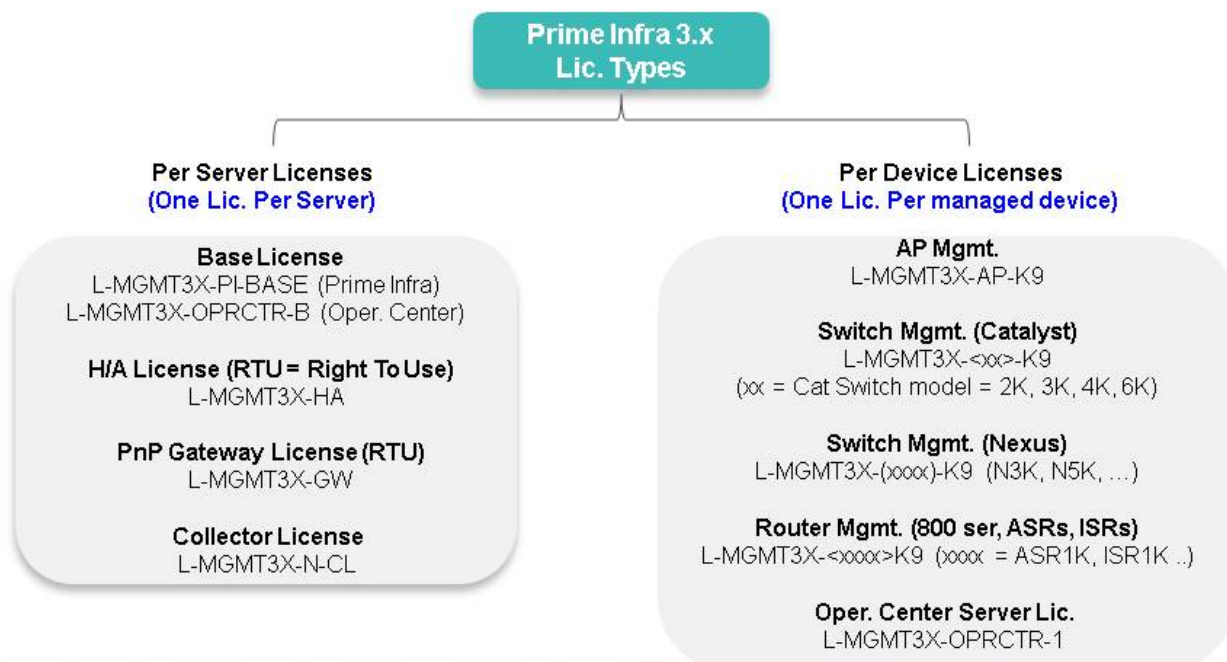

## PI 3.x / Cisco Ent. MGMT 3.x (1 of 2)

## PI 3.x / Cisco Ent. MGMT 3.x (2 of 2)

### PI 3.x License Inventory

Customer has in his / her PI an inventory of tokens or licenses

- 1 PI-BASE Token
- 100 PI-LF Tokens
- 100 PI-AS Tokens
- 100 PI-US Tokens
- 100 PI-UV Tokens

Inventory of Licenses / TOKENS

## 4. APIC EM Controller and Apps – Product Licensing & Support

### APIC EM Controller and Apps – Product Licensing

- **APIC-EM Controller Software and Basic Apps** (PnP, PKI, Inventory, Topology, etc.)
  - Offered at no cost
  - Customers can download the APIC-EM controller software (ISO Image) and run it on bare-metal Cisco UCS® servers or run this ISO image on a VM in a ESXi environment. In both cases, customers need to ensure the required CPU, memory, and storage resources are available.
- **Per-Device Licenses to Run Solution Apps** (IWAN app and similar Cisco developed solution apps\*)
  - Can be acquired by purchasing Cisco® Enterprise Management 3.X device licenses
  - APIC-EM Solutions Apps licenses can only be purchased by purchasing Enterprise MGMT 3.x licenses, which also gives the customer Cisco Prime™ Infrastructure licenses
  - The process for acquiring Prime Infrastructure 3.0 device licenses is explained in this document. The same process will also provide customers with right-to-use (RTU) licenses for APIC-EM Solution Apps

\* Customers with a valid support contract (SWSS) will have access to solution apps that are released from time to time. Customers without a valid support contract can purchase the contract or purchase MGMT 3.x upgrade SKUs (as applicable) to get entitlement to the new apps.

### APIC EM Controller and Apps - Technical Support

- **APIC EM UCS Appliance (if applicable)**
  - Hardware support through Cisco SMARTnet® Service
- **APIC EM Controller, Basic Apps and Services (PnP, Topology, PKI), Current IWAN App, API Performance, and Core Syntax**
  - Cisco® TAC support offered at no additional cost if the customer has SMARTnet on any Cisco networking device
- **APIC-EM Solution Apps (for example, a future IWAN App or other Cisco developed apps)**
  - TAC support offered at no additional cost if the customer has SWSS (maintenance contract) on MGMT 3.X device licenses

#### App Developer Support/Programmer Assistance Services

- Available through the DevNet community at no cost; paid services are available for live support

## 5. FAQs and Proposed Solutions

### Q 1

- Expired demo license or nearing expiration data

#### Solution

- Go to <https://survey.opinionlab.com/survey/s?s=10422>

## **Q 2**

- Requiring assistance with downgrading license from one version of Prime Infrastructure to a lower version of Prime Infrastructure (node-lock removed license to node-locked license, Prime Infrastructure 2.x to Prime Infrastructure 1.x)

### **Solution**

- Go to <https://survey.opinionlab.com/survey/s?s=10422>

## **Q 3**

- Trying to mix evaluation and permanent licenses

### **Solution**

- Use one or the other depending on the situation (evaluation OR permanent license)

## **Q 4**

- Installing multiple base licenses and getting an error

### **Solution**

- Remove the extra base license

## **Q 5**

- Trying to install LMS, LMS Compliance or WCS licenses on Prime Infrastructure, and getting an error

### **Solution**

- Remove the licenses causing issues and install only Prime Infrastructure Licenses

Note: LMS licenses provided with Prime Infrastructure purchases cannot be used on Prime Infrastructure. Prime Infrastructure Compliance license (despite its name), can only be applied on LMS. Basic compliance functionality is provided in Prime Infrastructure and it does not require the compliance license.

## **Q 6**

- Installing licenses and the license count displayed is different (generally less than) the license count on the license file

### **Solution**

- Inspect the license file content and the displayed content
- Remove and reinstall the license

## **Q 7**

- Missing base license and trying to install Assurance (PI-AS) license

### **Solution**

- You need to purchase the base license and install that on Prime Infrastructure 2.x prior to installing Assurance license (PI-AS)

## **Q 8**

- Installing UCS Server management license (PI-US) on Prime Infrastructure 2.2 (or earlier) version without the necessary Tech Pack
- Installing UCS VM management license (PI-UV) on Prime Infrastructure 2.2 (or earlier) version without the necessary Tech Pack

### **Solution**

Note: UCS Server and UCS VM Management functionality was introduced with the introduction of tech packs

- You need to upgrade to PI 2.2 and apply the necessary tech packs (refer to [associated release notes on Cisco.com](#))

### **Q 9**

- Installing Node Lock Removed Licenses on Prime Infrastructure 2.1 or earlier and getting an error

### **Solution**

- Node lock removed licenses can only be installed on Prime Infrastructure 2.2 or higher versions
- Upgrade to Prime Infrastructure 2.2 or Replace node lock removed licenses with node locked license
- Contact Global Licensing Operations (<https://survey.opinionlab.com/survey/s?s=10422>) and request that they be issued node locked licenses; Note that Global Licensing Operations will invalidate the node lock removed licenses; you will need to provide UDI

### **Q 10**

Deploying a mix of node-locked, node-locked removed and/or licenses from different versions of Prime Infrastructure

### **Solution NOTE**

Prime Infrastructure 2.2 and higher will accept licenses from NCS 1.0, Prime Infrastructure 1.x, Prime Infrastructure 2.x (node-locked license) and Prime Infrastructure 2.x (node lock removed licenses).

Prime Infrastructure 3.0 will accept all licenses accepted by 2.2 and also accept Prime Infrastructure 3.0 licenses

### **Q 11**

- Re-hosting your licenses from one Prime Infrastructure to another

### **Solution NOTE**

Re-hosting of license is required only if you are running Prime Infrastructure 2.1 or earlier. Starting with Prime Infrastructure 2.2, the licenses are not node locked. Node lock removed licenses do not need to be re-hosted. You can just save a copy of your node lock removed licenses and use them in your Prime Infrastructure

Migrating from Virtual Appliance to Physical Appliances also do not require re-hosting if you are

running Prime Infrastructure 2.2 or higher

### **Q 12**

- Installing both Prime Infrastructure and Prime Infrastructure Operations Center licenses on the same instance of Prime Infrastructure and getting an error

### **Solution**

Note: You cannot run a server as both Prime Infrastructure and Prime Infrastructure Operations Center at the same time

- You need to remove Prime Infrastructure licenses from the Prime Infrastructure Operations Center Instance

### **Q 13**

- Consolidating multiple licenses or splitting one large license to multiple licenses

### **Solution**

- Go to <https://survey.opinionlab.com/survey/s?s=10422>

### **Q 14**

- Assistance request with licenses purchased with Cisco ONE SKUs

### **Solution**

- Go to <https://survey.opinionlab.com/survey/s?s=10422>
- Note: Cisco ONE licenses cannot be applied on Prime Infrastructure 1.x or NCS 1.0

### **Q 15**

- Question regarding Prime Infrastructure license for some specific networking device or UCS servers

### **Solution**

- Please see ordering guides for Prime Infrastructure 3.x or Prime Infrastructure 2.x  
<http://www.cisco.com/c/dam/en/us/products/collateral/cloud-systems-management/prime-infrastructure/presentation-c97-735996.pdf>
- Go to <https://survey.opinionlab.com/survey/s?s=10422>

### **Q 16**

- Resends: Prime Infrastructure 2.x and 3.0 do not require node-locking so rehost or RMA are not applicable. For resends of an existing license, customers should use LRP (License Registration Portal) rather than open a case with Global Licensing Operations.

### **Solution**

- License Registration Portal Guide:  
[https://www.cisco.com/web/fw/tools/swift/xui/PDF/licensing\\_portal\\_user\\_guide.pdf](https://www.cisco.com/web/fw/tools/swift/xui/PDF/licensing_portal_user_guide.pdf)
