

# Cisco Small Business Switches Model Object Identifiers (OIDs)

## Objective

The Simple Network Management Protocol (SNMP) is an Internet-standard protocol used to manage devices on IP networks. The SNMP messages are used to inspect and communicate information about managed objects. SNMP uses Management Information Bases (MIBs) to store available objects in a hierarchical or tree-structured namespace that contains object identifiers (OIDs). An OID identifies the information in the MIB hierarchy that can be read or set via SNMP.

SNMP Views are a subset of MIB objects that can be assigned to an SNMP access group to control write, read, and notification privileges of SNMP users over MIB object information. A view is a user-defined label for a collection of MIB subtrees. Each subtree ID is defined by the OID of the root of the relevant subtrees. Either well-known names can be used to specify the root of the desired subtree or an OID can be entered.

This article provides the list of model object identifiers of all Cisco Small Business Switches.

## Applicable Devices

- Sx200 Series
- Sx220 Series
- Sx250 Series
- Sx300 Series
- Sx350 Series
- SG350X Series
- Sx500 Series
- Sx550X Series

## Software Version

- 1.1.1.2 — Sx220
- 1.4.7.05 — Sx200, Sx300, Sx500
- 2.2.8.04 — Sx250, Sx350, SG350X, Sx550X

## Cisco Small Business Switches Model OIDs

The following are the OIDs for the Cisco Small Business Switches.

- [Sx200 Series](#)
- [Sx220 Series](#)
- [Sx250 Series](#)
- [Sx300 Series](#)
- [Sx350 Series](#)
- [SG350X Series](#)

- [Sx500 Series](#)
- [Sx550X Series](#)

**Note:** The private Object IDs are placed under:  
enterprises(1).cisco(9).otherEnterprises(6).ciscosb(1).switch001(101).
