

# Cisco Secure PIX Firewall FTP

Severity ID : cisco-sa-20000316-pix-ftp  
Date : 2000-03-16 16:00  
Version : 1.7 : Final  
Workarounds : No Workarounds available  
Cisco ID :

**Severity: Critical**

## Impact

Cisco Secure PIX Firewall FTP (File Transfer Protocol) is vulnerable to Denial of Service (DoS) attacks. An attacker can exploit this vulnerability to cause a denial of service on the affected device. This vulnerability is identified by Bug ID CSCdp86352 and CSCdr09226. The vulnerability is caused by a buffer overflow in the FTP server process. The severity of this vulnerability is Critical. For more information, please refer to the following URL: <https://sec.cloudapps.cisco.com/security/center/content/CiscoSecurityAlert-20000316-pix-ftp>

## CVSS Score

CVSS Score: 10.0

## Workaround

Secure PIX Firewalls, affected versions are 4.2(5) and 5.1(1). Cisco Secure PIX Firewall 5.1(1) is not affected. For more information, please refer to the following URL: <https://sec.cloudapps.cisco.com/security/center/content/CiscoSecurityAlert-20000316-pix-ftp>
