

Cisco OpenSSL® CVE-2004-0079, CVE-2004-0112, CVE-2004-0081

Severity: Critical
Affected Products: Cisco-SA-20040317-openssl
Published: 2004-03-17 13:00
Version: 1.6 : Final
Workarounds: No Workarounds available
Cisco Bug ID:

- [CVE-2004-0079](#)
- [CVE-2004-0112](#)
- [CVE-2004-0081](#)

OpenSSL is a free and open source software implementation of SSL and TLS protocols.

OpenSSL

OpenSSL is a free and open source software implementation of SSL and TLS protocols. It is used by many applications, including web browsers and mail servers.

OpenSSL is a free and open source software implementation of SSL and TLS protocols.
