

ATA-186 Password Disclosure Vulnerability

Severity: Cisco-SA-20040329-ata-password-disclosure
Published: 2004-03-29 01:00
Version: 1.2 : Final
Yes
Cisco ID :

Summary: Cisco ATA-186 Analog Telephone Adapter (ATA) is vulnerable to a Denial of Service (DoS) attack.

Impact:

Cisco ATA 186

The Cisco ATA 186 is vulnerable to a Denial of Service (DoS) attack. An attacker can exploit a buffer overflow vulnerability in the ATA's firmware to cause a crash or denial of service.

The vulnerability is located in the ATA's firmware. An attacker can exploit this vulnerability by sending a specially crafted SIP request to the ATA. This request causes a buffer overflow in the ATA's firmware, which can lead to a crash or denial of service.

The vulnerability is a Denial of Service (DoS) attack. The attacker can exploit a buffer overflow in the ATA's firmware to cause a crash or denial of service. The vulnerability is located in the ATA's firmware.

The vulnerability is a Denial of Service (DoS) attack. An attacker can exploit a buffer overflow vulnerability in the ATA's firmware to cause a crash or denial of service.
