

# Cisco Wide Area Application Services (WAAS) Denial of Service

Product ID : cisco-sa-

[CVE-2017-](#)

20171004-waas

[12256](#)

Published : 2017-10-04 16:00

Version : Final

CVSS Score : [6.5](#)

Workarounds : No workarounds available

Cisco ID : [CSCve82472](#)

Denial of Service (DoS) vulnerability in Cisco Wide Area Application Services (WAAS) Connect Edition, versions 1.0 through 1.1, allows remote attackers to cause a denial of service (CPU usage spike) via a crafted request.

## Summary

Cisco Wide Area Application Services (WAAS) Connect Edition, versions 1.0 through 1.1, allows remote attackers to cause a denial of service (CPU usage spike) via a crafted request.

Connect Edition, versions 1.0 through 1.1, allows remote attackers to cause a denial of service (CPU usage spike) via a crafted request.

WAAS Connect Edition, versions 1.0 through 1.1, allows remote attackers to cause a denial of service (CPU usage spike) via a crafted request.

WAAS Connect Edition, versions 1.0 through 1.1, allows remote attackers to cause a denial of service (CPU usage spike) via a crafted request.

WAAS Connect Edition, versions 1.0 through 1.1, allows remote attackers to cause a denial of service (CPU usage spike) via a crafted request.
