

Cisco Integrated Management Controller Cisco UCS Director DOM

Medium
Cisco Integrated Management Controller (CIMC) ID : cisco-sa-20180606-ucsdimes
Date : 2018-06-06 16:00
Version : 1.0 : Final
CVSS Score : 4.8
Workarounds : No workarounds available
Cisco ID : CSCvh12994

[CVE-2018-0149](#)

Medium

Medium

Cisco Integrated Management Controller (CIMC) is a component of Cisco UCS Director. This vulnerability affects Cisco UCS Director versions 1.0 through 1.0. The vulnerability is a Denial of Service (DoS) issue that can be exploited by sending a specially crafted request to the CIMC. This request causes the CIMC to crash, resulting in a complete loss of service. There are no workarounds available for this vulnerability.

This vulnerability is a Denial of Service (DoS) issue that can be exploited by sending a specially crafted request to the CIMC. This request causes the CIMC to crash, resulting in a complete loss of service. There are no workarounds available for this vulnerability.
