Command execution vulnerability in Cisco RV110W, RV130W, and RV215W routers.

## Impact

Cisco RV110W Wireless-N VPN, Cisco RV130W Wireless-N VPN, and Cisco RV215W Wireless-N VPN routers are affected.

The vulnerability allows an attacker to execute arbitrary commands on the device via the Web interface. The attack is performed by sending a specially crafted HTTP request to the device's web interface. The request contains a command that is executed on the device. This can lead to a complete compromise of the device.
