Denial of Service (DoS) via SSH

Summary

Cisco Firepower Threat

Defense (FTD) is vulnerable to a Denial of Service (DoS) attack via SSH.

The vulnerability is caused by a buffer overflow in the SSH daemon.

The attack can be performed against FTD devices running SSH.

The attack is performed by sending a specially crafted SSH packet.

SSH

The attack is performed by sending a specially crafted SSH packet.

DoS

The attack results in a Denial of Service (DoS) condition.

The attack is performed by sending a specially crafted SSH packet.

The attack is performed by sending a specially crafted SSH packet.
