

Cisco® ASA, Firepower Threat Defense (FTD) and AnyConnect SSL VPN «DoS»

Severity: Medium
Product: Cisco-asa-vpndtls-dos-TunzLEV
Published: 2022-04-20 16:00
Updated: 2022-05-02 17:17
Version: 1.1 : Final
CVSS: 5.8
Workarounds: No workarounds available
Cisco ID: CSCvz09106

[CVE-2022-20795](#)

Summary: Cisco ASA, Firepower Threat Defense (FTD) and AnyConnect SSL VPN are vulnerable to a Denial of Service (DoS) attack.

Details

Cisco ASA, Firepower Threat Defense (FTD) and AnyConnect SSL VPN are vulnerable to a Denial of Service (DoS) attack. The vulnerability is caused by a buffer overflow in the TLS (DTLS) handshake process. An attacker can exploit this vulnerability by sending a specially crafted request to the affected device, which can cause the device to crash or become unresponsive. This attack can be performed against any version of the affected software.
