## Controller (APIC) - CVE-2023-20230

Cisco Application Policy Infrastructure (APIC) ID : [cisco-sa-apic-CVE-2023-](#)

[uapa-F4TAShk](#)

[2023-20230](#)

Published : 2023-08-23 16:00

Version : Final

CVSS Score : [5.4](#)

Workarounds : No workarounds available

Cisco ID : [CSCwe56828](#)

**Summary:** A vulnerability in the Cisco Application Policy Infrastructure (APIC) Controller (APIC) allows an attacker to bypass the authentication mechanism and gain unauthorized access to the system.

### Impact

Cisco Application Policy Infrastructure

Controller (APIC) - CVE-2023-20230

The vulnerability in the Cisco Application Policy Infrastructure (APIC) Controller (APIC) allows an attacker to bypass the authentication mechanism and gain unauthorized access to the system.

The vulnerability in the Cisco Application Policy Infrastructure (APIC) Controller (APIC) allows an attacker to bypass the authentication mechanism and gain unauthorized access to the system.

The vulnerability in the Cisco Application Policy Infrastructure (APIC) Controller (APIC) allows an attacker to bypass the authentication mechanism and gain unauthorized access to the system.
